Enabling extraordinary children  
to live ordinary lives

## Equipment Services

Enabling extraordinary children to live ordinary lives

On average a family with a disabled child needs 5 pieces of specialist equipment to provide the basic level of care.

We don't believe in waiting lists for children. Early provision of equipment can prevent the development of associated health problems, stimulate movement and provide essential physiotherapy.

We provide mobility and sensory equipment for disabled children to enable them to live fulfilled and happy lives.

“Growing up my favourite story has always been ‘The Very Hungry Caterpillar.’ When I got my powered wheelchair I felt like I had gone from being a caterpillar to as free as a butterfly.”
