

STEP Programme

Support and Therapy Enabling Progress

Every 30 minutes a child will acquire a brain injury.

Children with a brain injury have difficulty controlling muscles and movement as they grow and develop. They also have associated problems relating to their vision, hearing, learning and behaviour.

The STEP Programme we provide helps children to reach their individual potential by increasing their mobility and independence.

“The difference in our son is unbelievable, he now sleeps better, eats better, is more alert and sits independently! The list goes on! Without therapy he definitely wouldn't have progressed and developed as much as he has.”

Ben's mother

How you can help

Become a Project Ambassador / Corporate Sponsor

A commitment of £1,000,000 can help the STEP Programme reach up to 3,000 children giving hope for a better future.

£5 a month

can help provide a therapy session for a child with a brain injury

£2,000

can provide 1 year of therapy for a child with a brain injury

£20,000

can provide a therapist to give therapy to 80 children with a brain injury per year
